

Start Time	End time	Topic
8:00AM	8:15AM	Sign-in, class materials; pretest
8:15AM	8:45AM	Pre-course review; Kinesio Taping Terminology
8:45AM	9:15AM	Pre-course review: Skin and Space/Cooling/Movement
9:15AM	10:00 AM	What is Sensory Point (SPT) with Kinesio Medical Tape (KMT)?
10:00AM	10:15AM	Break from 10:00AM-10:15AM
10:15AM	10:45AM	Taping: Taping for a sign/symptom vs Taping for "an underlying cause"
10:45AM	12:00PM	Posture and Proprioception; Kinesio Taping Method Assessment: Manual Directional Test (MDT); Lab: Convolutions
12:00PM	1:00PM	Lunch
1:00PM	1:30PM	Creating your problem list; Review KMT Corrective techniques (E/D correction, Fascia correction, Lymphatic correction, Space Correction, Functional Correction, and SPT)
1:30PM	2:15 PM	Lab: SPT with KMT E/D Correction (face)
2:15PM	3:00PM	Lab: SPT with KMT Fascia Correction (Breath-BOD)
3:00PM	3:15PM	PM Break
3:15PM	3:45PM	Lab: SPT with KMT Lymphatic Correction (Digestion: LCU)
3:45PM	4:00PM	Lab: SPT with KMT SPT/Space Correction (Face-Lip closure/jaw elevation)
4:00PM	4:30PM	Lab: SPT with KMT Functional Correction/SPT (Neck: Upright Head positioning)
4:30PM	5:00PM	Review/Discussion; Q&A

Agenda: Day 1

Instructor

JUDITH MACIAS-HARRIS, M.S., CCC-SLP/BSLP/CKTI
Judith (Judee) Macias-Harris, M.S., CCC-SLP/BSLP/CKTI is a speech-language pathologist. She is versed in TMJ disorder, VFD, dysphagia/feeding, and speech/language/cognitive/voice deficits for peds/adults. She specializes in manual therapies and has been a Certified Kinesio Tape Instructor (CKTI) since 2014.

Guest Presenter (Recorded Presentation)

“Title: Compensatory muscle patterns of the orofacial, head and neck region”

CHRIS ZOMBEK, BSDH, COM
She has spent 33 years in the dental industry. She has been a long-time member of ADHA (American Dental Hygiene Association) She is a certified orofacial myologist through the IAOM. She owns a successful orofacial myofunctional in Carroll County Maryland. She loves mentoring and inspiring new orofacial myofunctional therapists and educating potential collaborating professionals how to recognize myofunctional disorder in order to refer.

Financial — Receives payment for guest presentation services from Logopedia Speech Therapy Services. Content presented is property of Chris Zombek and is separate and discrete from the Sensory Point with Kinesio® Medical Taping (KMT™) content.

Course Descriptions

This is a 16-hour, two- part introductory course on The Kinesio Taping® Method (KTM). The curriculum is designed for stomatognathic interdisciplinary professionals who are interested in learning how to use Kinesio Tape® with The Kinesio Taping® Method (KTM) in the head/neck areas. Specialist focus may be on improving function/pain for TMJ related concerns, or dysfunctions associated with muscles affecting facial expression, chewing, swallowing, tongue ROM, lip closure, etc.

- Four (4) hours online pre-course on The Kinesio Taping® Method (KTM)
- 12 hours of direct instruction/workshop.

Objectives: At the completion of this course, participant will be able to:

1. Name corrective taping strategies aligned with The Kinesio Taping® Method (KTM).
 2. Use qualitative/quantitative methods as diagnostic tools to measure pre/post outcomes of learned corrective taping techniques associated with the Kinesio® Medical Taping (KMT™).
 3. Participate in a group case study to help create a plan of care (SOAP note format). The group will include qualitative/quantitative assessment information (e.g., “problem list”, MDT, common industry used assessment examples) to rationalize the use of a learned Kinesio Tape® application. The participant will also list precautions, contraindications, and a recommended HEP.
 4. Engage in guided laboratory training, with focus on assessment methods, treatment methods, and uses of elastic therapeutic tape with Kinesio Tape®.
- There will be no or limited information about similar products or services.
 - Kinesio University contributes financial and in-kind support for this workshop.

A four (4) hour online pre-course, with eleven modules, that teach the science behind The Kinesio Taping® Method (KTM). Modules include:

- a. The scientific research studies about the effects of The Kinesio Taping® Method (KTM).
- b. Understanding precautions & contraindications of The Kinesio Taping® Method (KTM)
- c. Application and guidelines for use.
- d. Kinesio Tape® cuts and application and recommended removal methods to maintain skin integrity
- e. Kinesio Taping® Method (KTM) screenings/assessments
- f. Education and practice of the seven (7) The Kinesio Taping® Method (KTM) corrective techniques (EDF, Fascia, Mechanical, Space, Ligament/Tendon, Functional and Circulatory).
- g. Clinical scenarios to help guide The Kinesio Taping® Method (KTM) practice and method for use.

*Participants will have hands-on opportunities to use, cut, and apply Kinesio Tape® within instructed modules.

*Participants will need to pass this pre-course one week prior to taking the 12-hour direct instruction class in order to receive CEU's.

*The four hour online pre-course, behind The Kinesio Taping® Method (KTM), is a required interdisciplinary course for participants..

- A. Sensory Point with Kinesio® Medical Taping (KMT™)
 - a. This is a 12-hour introductory course provided via direct instruction. This course focuses on applying Kinesio Tape® Correction strategies (learned from the pre-course) to use for improved function in the oral/facial, breath, and digestion.
 - b. The participant will lab eight (8) corrective techniques (EDF, Fascia, Mechanical, Space, Ligament/Tendon, Functional and Circulatory) and a specialty cut (SPT). The participant will also be introduced to scar remodeling using a 72 tuning fork and Kinesio Tape®.
 - c. The participant will participate in a group case study to help create a plan of care (SOAP note format). The group will include qualitative/quantitative assessment information (e.g., “problem list”, MDT, common industry used assessment examples) to rationalize the use of a learned Kinesio Tape® application for the face, neck, and/or scar management/vibroacoustic. The participant will also list precautions, contraindications, and a recommended HEP.
